

COMPANY OVERVIEW

NGENIUS

ENGINEERING EXCELLENCE

About Us

Whether it's **developing new products**, **enhancing existing products**, or **staffing for critical projects**, we are dedicated to delivering comprehensive solutions without breaking the bank.

Develop Trust

The key to a successful partnership.

Integrity

Do the right thing. Always.

Excellence

Do our best to be the best.

Transparency

Open collaboration.

Our Services

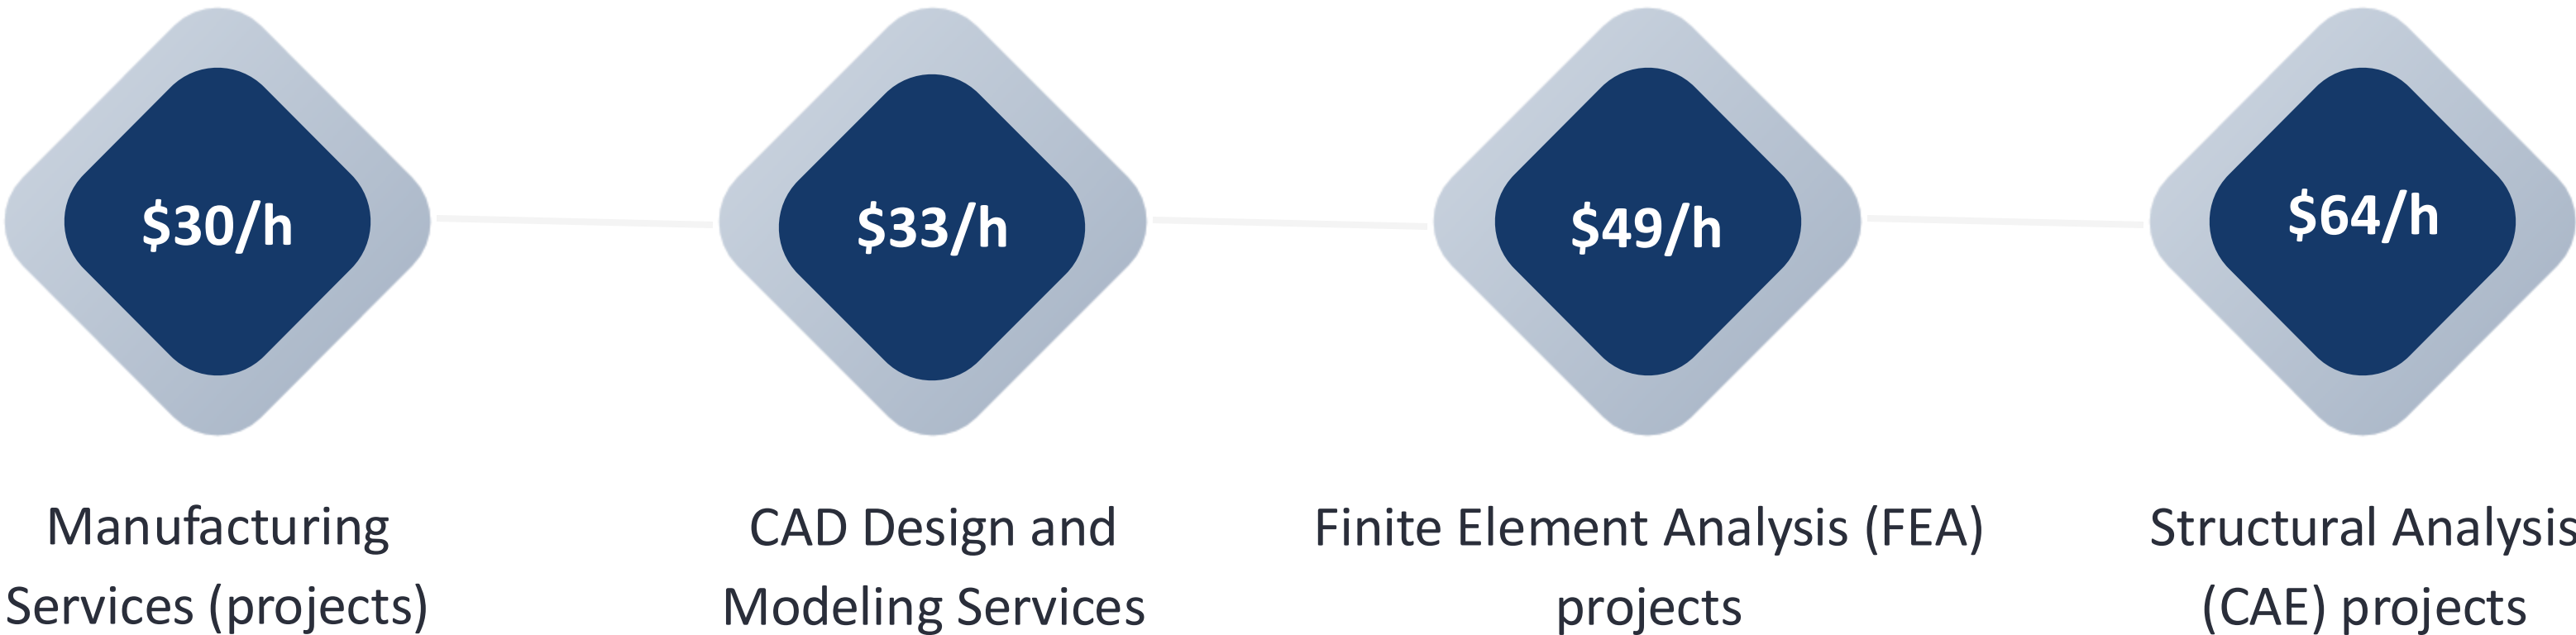

Product Development and Staffing Services

nGenius provides the technical expertise and the necessary resources, both direct hire and contract, to execute successful manufacturing or engineering projects.

- ◆ **Engineering Design (New and Existing)**
- ◆ **Engineering Simulation (FEA / CFD)**
- ◆ **Sourcing and Procurement**
- ◆ **Software Engineering and Development**
- ◆ **Direct Hire and Contract Staffing**

Cost Savings

Sample offshore hourly bill rates

Bill rates are all-inclusive including talent resource, software, hardware, and overhead.

Our Strategic Partners

Rapidise

Embedded engineering services

Greaves

Mechanical engineering services

ARI Labs

Mechanical engineering services

Verve

Sourcing and procurement services

ProSource

Talent acquisition services

Rapidise

Product Development & Embedded Engineering Services

Electronic Services

Embedded Software & IOT Devices

Rapidise is an AI-driven, cloud-based platform designed to accelerate product engineering and electronics manufacturing. The company focuses on providing advanced IoT and AI product solutions, which include design, development, rapid prototyping, supply chain management, electronics manufacturing, and complete product assembly.

- ◆ Embedded software services
- ◆ Embedded hardware services
- ◆ IOT & AI Product development
- ◆ Information Technology

Greaves

Product Development & Mechanical Engineering Services

Mechanical Services

Design & Manufacturing Services

Greaves Technologies is a comprehensive engineering and R&D services provider specializing in digital solutions across the product development lifecycle. They offer a full range of services, including design, CAE, manufacturing, supply chain management, new product and supplier development, embedded systems, and digitalization.

Product Design Services

Electrical harness & Schematic Services

Manufacturing services

Testing & Validation Services

ARI Labs

Product Development & Mechanical Engineering Services

Mechanical Services

Design & Engineering Simulations

ARI Labs is an Applied Research & Innovation Organization focused on creating impactful technologies to improve human well-being, especially in the Agriculture, Automotive, Aerospace, and MedTech sectors.

- ◆ Engineering Simulation Services
- ◆ Aerospace & Drone Technology
- ◆ Bio-Medical Devices & Material Selections
- ◆ Product Benchmarking Services

Sourcing, Manufacturing and Procurement Services

Component Services

Sourcing and Procurement

Verve B2B Services LLP is a firm that is backed by a highly skilled team of professionals who bring extensive expertise in operations management, purchasing, quality assurance, and supplier management.

Supplier Development Services

Procurement & Component development

Energy Efficiency Solutions

Optimization & Cost savings

ProSource

Talent acquisition for direct hire and contract staffing requirements

Staffing and Recruiting Services

Founded in 2017, ProSource is a division of nGenius that has been providing staffing and recruiting services nationwide for years. While they support a wide variety of needs, their wheelhouse lies within engineering, technology and finance.

- ◆ Contingent talent searches (standard)
- ◆ Retained talent searches (premium)
- ◆ Contract staffing (onshore and offshore)
- ◆ Immigration and Sponsorship services
